Dear Potential Applicant,

CNC Operator duties and responsibilities

A CNC Operator has many duties and responsibilities in any field of production. Some things expected of a CNC Operator daily include:

Read and understand blueprint designs

Set up machinery for production

Rework metal to create the blueprint design

Measure and verify all calculations prior to setting up the machinery

Maintain a clean and organized working environment

Complete routine maintenance of their machinery

Enter all relevant codes to specify the feed, speed, and cut of any toolpath for a CNC

Sincerely,

Jennifer & Todd Hoffman
